

Exocet Anti-Bug (XO1943XB) & Anti-Bug Plus (XO1941XB)

(Fuel Soluble Biocide) – Addresses Microbiological Contamination

Description

Liquid, multi-component, fuel soluble based biocide with extensive field experience

Application

These additives control microbiological contamination where up to 1 % volume water is present. They prevent operating problems caused by microbiological contamination such as oil/water emulsions (produced by organic acids); sludge and slimes; plugging filters, injectors, burners and gauges; blistering of seals, hoses and connections; accelerated tank and pipes corrosion. These products are suitable for batch treatment in tanks (e.g. bottle dosing and splash blending) or continuous injection into a flowing stream.

1 Litre Bottle of Exocet Anti-Bug (XO1943XB)
Treats 2,500 litres of Fuel
Maintenance dose 100ml treats 5,000 litres of fuel

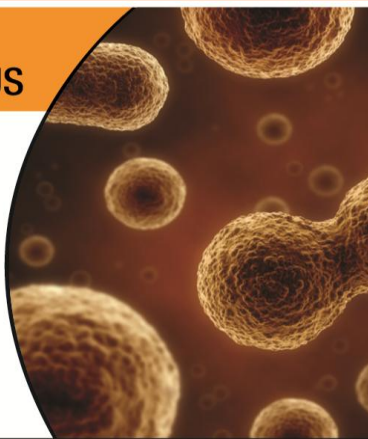

1 Litre Bottle of Exocet Anti-Bug Plus (XO1941XB)
Treats 10,000 litres of Fuel
Maintenance dose 100ml treats 20,000 litres of fuel

Exocet Anti-Bug & Exocet Anti-Bug PLUS

Biocide Treatment

- Controls microbiological contamination
- Inhibits sludge and slime build up
- Reduces plugging of filter burners and gauges
- Protects against tank and pipe corrosion

1 litre bottle of Exocet Anti-Bug treats 2,500 litres of fuel
1 litre bottle of Exocet Anti-Bug PLUS treats 10,000 litres of fuel
