Exocet Fuel Store Plus (XO1270FS)

EXOCET FUEL STORE PLUS

Exocet Fuel Store products have been specially formulated to protect fuels and fuel systems where fuel is stored for long periods of time and the associated equipment (e.g. engine, generator, etc.) is used only infrequently. The products contain powerful antioxidants that inhibit the growth of fuel degradation products associated with ageing and thus reduce the potential for sludge build up in fuel tanks that could be carried over into fuel pipes and engines resulting in blocked filters, and varnishing. The products also contain a fuel biocide that acts to prevent microbial growths which themselves can promote operational problems and accelerate system corrosion.

Typical applications are:

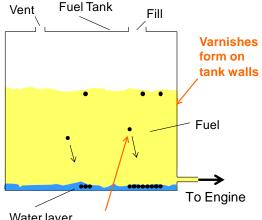

- Classic vehicles
- Seasonal agricultural, construction and horticultural equipment
- Leisure marine craft
- Generators

Pack sizes are available to treat commercial fuel tanks or typical car fuel tanks.

Deposits, Varnishes And Sludge Form In Storage Tanks

Water layer

Over time and/or heat (e.g. summer) small oxidation deposits form in the fuel, sink to the bottom and stick together to create sludge

Exocet Fuel Store Plus Designed for storage of all fuels

- Reduces deposit & varnish build-up
- Slowly disperses existing sludge
- Improves storage stability
- Prevents microbiological growth
- Proven on biodiesel

Each 1 litre bottle treats up to 4,000 litres of fuel
